

ENVIRO

Filtration and Dual Power Clean Kit For Waterborne Spray Gun Cleaners

BECCA FILTRATION SYSTEMS - FREE UP OPERATOR TIME

BECCA's Filtration Systems are designed to remove paint residues from the system continually. This in combination with the proprietary BECCA Clarification System provides a cleaner process and allows for less periodic maintenance of the system.

BECCA SINGLE CARTRIDGE FILTRATION

The ENVIRO E50M and E100M have a 75 Micron Filter Module to help provide a more productive system.

Single
Cartridge
System

BECCA DUAL CARTRIDGE FILTRATION

The ENVIRO E300A, E700M & E800A have a two stage Filter System including a 75 Micron and a 25 Micron Filter providing the best overall paint residue control.

Dual Cartridge System
