

BECCA WATERBORNE HEAT SYSTEMS

BECCA EXCLUSIVE HEAT ON DEMAND

This rapid heat rise, energy efficient design meets Class I Division 1 requirements allowing it to be placed inside the paint mix room..

A User Reports: "The warm cleaning solution really gets the fluid passageways clean quickly, and my fluid tip, needle and seals stay clean. It's GREAT!"

BECCA EXCLUSIVE STANDARD HEAT SYSTEM

Similar to a hot water tank, this system utilizes a heat band and is programmed with a supplied timer to reach the ideal cleaning temperature. This affordable heat option is ideal for units placed outside the paint mix room.

BECCA SOLVENTWASH™

Filtration Recycling Systems for Solvent Spray Gun Cleaners

BECCA has determined that when a shop converts to waterborne basecoats, the usage of solvent drops below the threshold that justifies the investment of a new distillation recycling system. The new BECCA SOLVENTWASH™ Series provides:

- Lower new system investment
- Reduced long term maintenance cost
- Less shop floor is required
- Increased painter up-time

BECCA®

Paint Spray Gun Cleaners

Waterborne & Solvent
For The Finishing Professional

Spray Gun Cleaner Benefits

- **Made in USA**
- **Color Coded Equipment -**
